

I, claim.

1. A pocket protector consisting of an outer pocket fabric, and an inner pocket fabric, secured along their edges to form a pocket; wherein the improvement comprises a reinforcing material that is affixed to and runs down the outer fabric of the pocket and is affixed to and runs up the inner fabric of the pocket.
2. A pocket as recited in claim 1, wherein the reinforcing material is flexible stainless steel wire.
3. The pocket as recited in claim 2, wherein the flexible stainless steel wire is affixed to the outer pocket fabric and the inner pocket fabric with embroidery stitching.
4. The pocket as recited in claim 2, wherein the flexible stainless steel wire is affixed to the outer pocket fabric and the inner pocket fabric with an iron on patch.
5. A pocket as recited in claim 2, wherein the reinforcing material is flexible multiple strand stainless steel wire.
6. A pocket as recited in claim 2, wherein the stainless steel wire has multiple strands.
